

Introducing the

NillyNoggin® EEG Cap!

Colorful - Fun - Functional

Designed for children to wear while receiving an ambulatory or prolonged EEG. Created by a mom who has a daughter suffering from severe epilepsy.

- Aids functionality for EEG technicians to access leads
- Helps protect leads from wandering hands
- Offers choice of a fun, colorful cap to coverup the “scary”
- Comfortable, breathable, cool and snug
- Also great to wear during sleep studies!

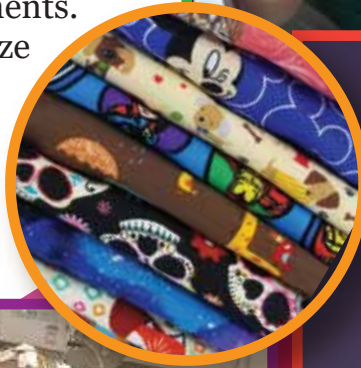

We often hear from parents and children with epilepsy that EEG procedures are traumatic. Hospital rooms can be sterile, medical environments. The procedure is also very sterile with white gauze and white tape. It can be very scary!

Children with epilepsy deserve a colorful, comfy, fun product! To take them to a “happy” place in spite of the seriousness of their illness and the EEG treatment.

Help us make sure each child that requires an EEG has an opportunity to receive a NillyNoggin® EEG Cap!

Less Stress!

Happy Kiddos!

Smiles Not Frowns!

Professionals Love NillyNoggin® EEG Caps!

- NillyNoggin caps **relieve the anxiety/ apprehension** brought on by the procedure.
- Choosing a NillyNoggin cap allows the child some **control over their situation.**
- I have personally seen the **delight in child's eyes** as they try on their NillyNoggin cap.

Russ P., EEG Technologist for 34+ years,
Children's Hospital of Pittsburgh of UPMC

● The hospital can be frightening and stressful to children. The NillyNoggin cap **covers the EEG** electrodes and leads, allows a child to 'forget' about the test and feel like a normal child.

- A **simple, yet profound**, way to brighten what could be a negative experience. NillyNoggin caps could benefit every child that comes to a hospital for an EEG.

Hannah W., Child Life Specialist,
Children's Hospital of Pittsburgh of UPMC

Together
let's make
a difference
in childhood
epilepsy!

Children feel special with the NillyNoggin cap.
Lessens the burden of the EEG Test.

Deana, Mom from Bethel Park, PA

Zoey gets anxiety about anything that makes her look 'different'. She was **able to go out in public** during her ambulatory EEG **without feeling self conscious!** The EEG technician **loved the ease of getting the NillyNoggin on/off.**

Jillian, Mom, Lincoln, NH

Wally loved the compliments he got wearing his 'cool hat'!

Melissa, Mom, OH

What Parents Are Saying

Hides how scary they [the leads] **look.** Hasn't fussed with the leads one time!
- Denise, Mom, Pittsburgh, PA

All the **nurses and the EEG guy loved it!** No more ugly weird leads,
just a cool hat for a cool dude!

Melanie, Mom, Washington, PA

Kylen actually said he's excited for the EEG because that cap is SO COOL!

Lisa, Mom, Greensburg, PA

The child life specialist **LOVED it!**

Kristin, Mom, Earlville, IL
